German Language   /   Entrepreneurship   /   International Media Management
Online Marketing   /   Audio Production   /   Photography   /   Presentation Skills

Future Goals

I am fascinated by science and engineering and I am eager to learn more about computer architecture, networks, backend technologies and programming languages such as JAVA, Python, C++, and even Assembly.

Hobbies

I enjoy playing football, volleyball, cycling, climbing, and tennis among other sports. I love catching up with good friends, having inspiring conversations, travelling, stand-up comedy and psychology. Finally, I am currently designing my first app, which will be a personalized timeline that helps people learn history in a visual way.

Why Me?

I am a person who knows his priorities and growing professionally is currently my first. So far I've successfully overcome every challenge which came my way when I started programming because I know how to find and use learning resources and I know why I'm doing it.

Sound good? Let's do it together!
